AWARDS RECEIVED

- Stipendium Hungaricum Scholarship

PERSONAL PROFILE

A highly-motivated computer science student currently looking for a part-time job in the area of web-development to gain some experience and be part of a community with experienced team members. I am eager to build scalable and responsive web-apps that delight end-users and also to share my own ideas.

EXPERIENCE

Eszetrhazy Karoly Catholic University

Intern at research team | Jun 2022 - Aug 2022

- Our five person team developed a Mind map web-application using TypeScript and React where my part was to implement changing background color, font-size and the border of a node.

PROJECTS

Face Detector

- Full-stack web application with sign in and register. This app detects faces on the link you input using Clarifai API. Technologies used: NodeJS, ReactJS, PostgreSQL. Learned how to use API bulding this app. Only frontend can be seen here: https://yslamguly.github.io/face-detector/

Book Store

- University project in PHP, JavaScript and MySQL with sign in, register and image upload. GitHub link: https://github.com/Yslamguly/BooksInventory

EDUCATION

Eszterhazy Karoly Catholic University

Computer Science Bsc | Sep 2020 - Present
